Fast Corp.
Attn. Dave Herre

I just wanted to send this letter with a few testimonies about the quality of Fast Corp. Ice Cream Machine.

1. One of our manufacturing accounts had their plant lose electricity for 24 hours. The ice cream machine was full with 10 different ice cream selections and only 10 items were lost due to the power failure. Your machine kept almost ALL of the products frozen.
2. Another account has a very high number of kids who buy a lot of the ice cream products due to your display and receiving of the product. These kids like to watch your machine in action and because of that, our ice cream sales at this location have increased.

In the past 6 years of using the Fast Corp. Ice Cream Machine, I find that the service repair calls on your machines are the least among the food machines we have in use at our account locations.

Thank you for manufacturing a product that has proven to me to be low maintenance, well designed and able to handle power failures. All of these features help to make my job easier (fewer service calls) and most of all our accounts are pleased with your machine.

Sincerely,

David Klein
