

"We purchased two Z-400 Food Courts in '06 just to try them out. As a follow up, I want to say that they are performing exceptionally well and we expect to be placing our next order for more machines. The Food Courts have allowed us to reduce 100% of the stales/waste associated with the cold food machines that were replaced. Along with the high capacity offered by the simple chest freezer design, the Food Court requires 3Xs fewer services resulting in a substantial reduction in labor and fuel costs associated with those placements. Simply put, we love the Z-400 Food Court Express and see it as an integral part of our food offering."
